EDUCATION

University of Ottawa

Ottawa, ON

Honours B.Sc. in Computer Science (Data Science Option)

Sept. 2024 – Present

- Minor in Greek and Roman Studies; Dean's Honour List – Fall 2025
- **Relevant Coursework:** Data Structures & Algorithms, Introduction to Formal Languages, Computer Architecture I, Introduction to Software Engineering, Programming Paradigms, Digital Systems I, Discrete Mathematics for Computing, Professional Practice in Computing, Databases (Data Models, Relational Databases, Storage Manager, Query Processing, Transactions, Architecture)

EXPERIENCE

Sales Associate

Apr. 2024 – Present

Gap Outlet Store

Ottawa, ON

- Process customer transactions accurately and efficiently through the POS system while maintaining strict attention to detail
- Track and manage inventory levels, including restocking and conducting stock counts, to keep operations organized and efficient

Tim Hortons

Ottawa, ON

Shift Supervisor & Team Member

July 2023 – Apr. 2024

- Directed daily operations for a team of staff as Shift Supervisor, delegating tasks and training new hires to keep workflow running smoothly during peak hours
- Monitored inventory and coordinated supply orders as Team Member, reducing waste and preventing stockouts; recognized as Employee of the Month for reliability and teamwork

Martial Arts Coach Assistant

May 2022 – Sept. 2023

Barrhaven Martial Arts / Super Seven Kids Daycare

Ottawa, ON

- Designed and led structured lesson plans for groups of children, adapting instruction to individual skill levels
- Coordinated class logistics and safety procedures, ensuring smooth transitions between activities

PROJECTS

eHotel – Hotel Reservation System | *React, Node.js, Express, PostgreSQL, Tailwind CSS* Oct. 2026 – Present

- Designed a normalized PostgreSQL schema (13+ tables) for a multi-chain hotel booking system, with triggers for automatic cost calculation, cascade-safe archiving, and data-integrity constraints
- Built a full-stack reservation app with a Node.js/Express REST API and a React front end, including room search with an interactive Leaflet/OpenStreetMap view and an employee check-in/check-out dashboard
- Integrated the OpenStreetMap Overpass API and Unsplash API to populate real hotel locations, coordinates, and photos

Parking Lot Simulator | *Java*

Jan. 2025 – Apr. 2025

- Implemented custom singly linked list, queue, and linked-queue data structures from scratch to model a parking lot's occupancy and traffic flow
- Built a discrete-event simulation of 24 hours of vehicle arrivals and departures using a triangular probability distribution and a clock-based stepping engine
- Collaborated with a partner across three iterative milestones: data modeling and file parsing, queue-based simulation, and a list-based structural refactor

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript, Go, Prolog, Scheme, SQL, HTML/CSS

Frameworks/Libraries: Django, Bootstrap, jQuery

Databases: PostgreSQL

Developer Tools: Git, VS Code, IntelliJ, Android Studio, DrRacket, SWI-Prolog, pgAdmin, Capstone

Areas of Interest: Cybersecurity, Data Science, Data Analytics, Software Development

Spoken Languages: English (fluent), Persian (fluent)

Interests: Fitness & Nutrition, Programming, Reading
